**POLICY REGARDING STUDENT USE OF
THE DISTRICT'S COMPUTER SYSTEMS AND INTERNET SAFETY**

Computers, computer networks, electronic devices, Internet access, and electronic messaging systems are effective and important technological resources. The Berlin Board of Education (the "Board") has installed computers and a computer network(s), including Internet access and electronic messaging systems, on Board premises and may provide other electronic devices that can access the network(s) and/or have the ability to send and receive messages with an operating system or network communication framework. Devices include, but are not limited to, personal computing devices, cellular phones, Smartphones network access devices, radios, personal cassette players, CD players, tablets, walkie-talkies, personal gaming systems, Bluetooth speakers, personal data assistants, and other electronic signaling devices. Electronic messaging systems include mobile, chat, and instant message; cloud collaboration platforms, including internal chat, peer-to-peer messaging systems, and draft email message transfer; and products that have the ability to create duration-based or subjective removal of content, such as Snapchat, and security focused platforms, such as Signal. The Board's computers, computer network, electronic devices, Internet access, and electronic messaging systems are referred to collectively as "the computer systems" and are provided in order to enhance both the educational opportunities for our students and the business operations of the district.

These computer systems are business and educational tools. As such, they are made available to students in the district for education-related uses. The Administration shall develop regulations setting forth procedures to be used by the Administration in an effort to ensure that such computer systems are used by students solely for education-related purposes. The Board will educate minor students about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyberbullying awareness and response. Additionally, the Board will implement a technology protection measure to block or filter Internet access to visual depictions that contain material that is obscene or obscene as to minors or contains child pornography, and ensure that such filtering technology is operative during computer use by minor students to the extent practicable when such students are using Board-owned computers or devices and Board-provided Internet access.

As the owner of the computer systems, the Board reserves the right to monitor the use of the district's computers and computer systems.
