

We Welcome You

Dive into a weeklong residential camp of hands-on, brains-on marine science. Cruise the waters of Long Island Sound aboard our research vessel and skiffs as you conduct oceanographic research. Study salt marshes, rocky intertidal zones, sandy beaches, and near-shore marine life. Under the guidance of professional marine scientists, campers will use marine science research equipment such as sediment corers, salinity meters, nutrient test kits, dissolved oxygen meters, otter trawls, and seine nets. Team-building and leadership activities will be woven into daily life as you forge lifelong friendships with your fellow campers and explore Long Island Sound!

Camp Life

Our waterfront hostel will be your home away from home for the week! Campers bunk together, four to each room, with male and female campers separated by floor. Our enthusiastic and highly trained residential staff provide more than just 24 hour supervision: they carefully monitor the needs of individual campers, organize games and activities during breaks in the action, and lend their scientific expertise as they nurture camper enthusiasm for science. The University of Connecticut Dining services provides delicious and nutritious meals to our hungry campers when they return to dry land, with careful attention to special dietary needs.

Tuition \$820

Military Discount \$50

Sibling Discount 10%

Multi Session Discount 10%

Camp Hours

Sunday 4pm - Friday 3pm

Summer 2019 Schedule

Week 1 June 23 - June 28
